

HONEY..HONEY..LION!

Giraffe

Old giraffes, baby giraffes, male giraffes and female giraffes are always interesting to watch. When a giraffe runs, it looks like it is moving in slow motion. Did you know that a giraffe can eat leaves from Acacia bushes that have 3 inch long, sharp thorns? They do it with their tough, black, square tongue. Giraffes look gangly, but they can kill a lion with a hard kick.
