

SCRAP BOOK

The technicians are working on the orbiter. They are wearing clean room suits just like in my book.

I went to the Kennedy Space Center in Florida to see the launch site of NASA missions.

WHERE DO IDEAS COME FROM?

BLUE ANGELS FLIGHT!

I flew in a lower atmosphere rocket with wings, a FA-18, on a Blue Angels V.I.P. ride with Lt. Col. Keith "The Judge" Hoskins. Ever since my ride I've wanted to tell of my respect for the teamwork, bravery and dedication of U.S. flyers, astronauts and their support groups. Go to my website to see a video of my flight.
