

Draw an Armadillo

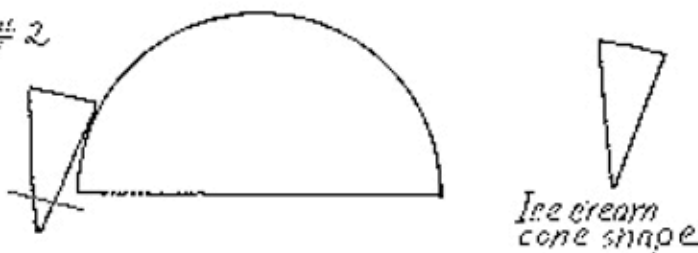

#1

Draw a circle with a pencil. Divide it in half. Erase the bottom half. This will create the shape of the armadillo's shell.

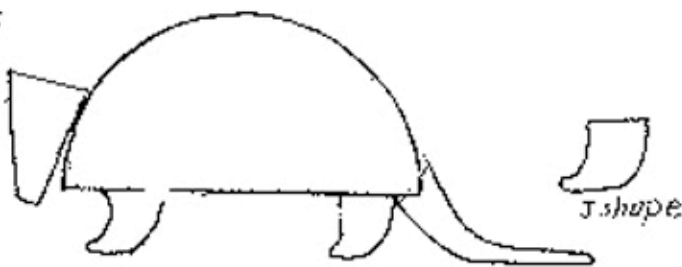

Please try this with a pencil and eraser

#2

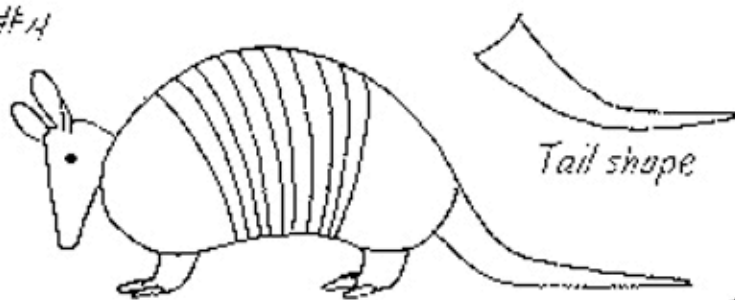

Add a shape like an ice cream cone to one side. After you're done, take off the pointed tip. This will be the head.

#3

Round off all the sharp angles; first on the head then on the shell. Add the legs. They are shaped like a fat J.

#4

Next draw the armadillo's ears, eye, tail, and the 10 stripes that will form the 9 bands. The armadillo has 4 claws in front and 5 in back.

If you'd like to add detail, you can put zig-zags on the 9 bands and dots on the armadillo's shell.
